FEATURES

- ⊙ Ambidextrous optical gaming mouse for both left and right handed gamers to use.
- ⊙ Powerful 5000 DPI optical engine that offers superior tracking across the widest variety of surfaces.
- ⊙ Shift through up to 5 DPI settings, from pixel-precise targeting (400 DPI) to lightning-fast maneuvers (up to 5000 DPI).
- ⊙ When changing DPI, the light on mouse wheel and Tt Dragon logo will flash for 3 seconds to match current DPI level.
- ⊙ OMRON engineered switches have a lifetime of 20 million clicks.
- ⊙ Store up to 25 programmable macro keys, across the 5 buttons and 5 profiles.
- ⊙ Brilliant illumination with 16.8 million color options on 2 separate zones to enhance gaming atmosphere.
- ⊙ 3 lighting options available (Static, Pulse, Spectrum Running).
- ⊙ Newly designed graphical user's interface for configuring macro keys, advanced performance and light options.
- ⊙ On board memory, plug and play while switching to different PC.
- ⊙ On-screen-display design to indicate profile and DPI status.
- ⊙ Advanced matte coating for improved comfort and durability.
- ⊙ Larger Teflon mouse feet for an improved, effortless glide.
- ⊙ Legacy Air-through ventilation system keeps the palms cool for both short and long term gaming.
- ⊙ Compact shape designed for fingertip and claw grips to ensure the maximum possible comfort.

SCROLL WHEEL ILLUMINATION

When Changing DPI, the Scroll wheel also flashes to denote which DPI level the VENTUS Z is on.

DRAGON LOGO LED

The iconic battle dragon lighting has been boosted to be brighter than before. Let the spirit of the battle dragon shine through more brilliantly than ever!

RGB LED ILLUMINATION

The VENTUS R features **RGB LED** illumination in two different regions- the mouse wheel and the battle dragon logo

Normal mode:

In normal mode, the mouse wheel and dragon logo will have static, pulse, Spectrum Running lighting.

Battle mode:

In battle mode, lighting for both regions will flash in correspondence to the user's clicking frequency.

AERODYNAMICALLY ENGINEERED

Integrated with Tt eSPORTS' Level 10 M Series ventilation concept, VENTUS's aerodynamically honeycomb designed mouse with breathability to keep your hand cool, allow you to manage the airflow while using the mouse and increase the flexibility of moving. This concept enhances expressively more ventilation as it will help ease sweaty palms throughout intense gameplay, let your hand cool, increasing your comfort and allow you to bring your performance to a new level. The maximum ventilation is ultimately required for keeping gamers cool. Due to the longer gaming time, aerodynamic gives advantage as it could influence your ability to compete over the long period.

16.8 MILLION COLORS

VENTUS R's new gaming software allows you to change lighting colors and options to make color up your intense battles! With our new VENTUS R, the intensity of each color can vary from 0 to 255, with 0 (zero) indicating the minimum intensity. Gamers can manage the colors (0~255, 0~255, 0~255) with both mouse and software to produce the stunning colors via the communication with the microcontroller. VENTUS R uses 8-bit for each Red, Green and Blue color (total of 24-bit) with 256 shades of red, 256 shades of green, and 256 shades of blue, equals to 16.8 million colors, giving you the millions of possible colors!
